Diabetes Services in Mississauga Halton LHIN

The following is a list of Adult & Pediatric Diabetes Programs in the Mississauga Halton LHIN. Diabetes Programs offer education, skill development and treatment for individuals living with diabetes to help effectively manage their condition.

Diabetes Programs

A DEP provides the tools & skills needed to support people living with diabetes. In both group settings and one-on-one counselling sessions, individuals learn self-management skills from a team of Healthcare Professionals and create life plans to help minimize their symptoms and/or prevent the onset of complications.

Centre for Complex Care

Centre for Complex Diabetes Care supports people with prolonged diabetes who are living with complex health issues such as organ failure, frequent hypoglycemia, foot and skin problems, mental health issues, and frequent hospital visits. Short term case management, care coordination and treatment are provided by an interprofessional team of nurse practitioner, Registered Dietician, Registered Nurse, Social Worker and Pharmacist.

The Central Intake Program

Central Intake Program receives, triages, and directs referrals to the appropriate service based on the patient care needs.
