

MH LHIN eConsult Summary

Here's what MH LHIN providers have told us...

Which of the following best described the outcome of this eConsult for your patient?

52%

of the
time

I got good advice for a new or additional course of action

AND

44%

of the
time

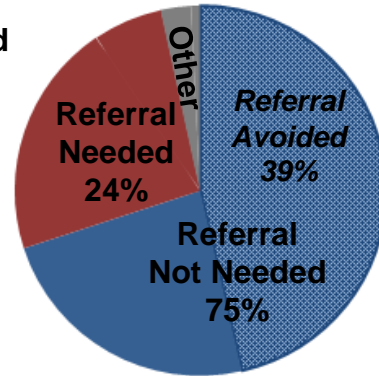

I was able to confirm a course of action that I originally had in mind

Which of the following best described the outcome of this eConsult for your patient?

75% of all eConsults did not lead to a face to face visit with a specialist

And in 39% of the cases, a referral was originally contemplated but now avoided as a result of eConsult

N= 1585 cases

Feedback from MH LHIN primary care providers:

“eConsult is different from a traditional consult, since the consultant is free to focus on more relevant clinical questions and write a more reflective response. A traditional consult would have spin-offs of more tests and more visits to both GP and specialists. eConsult is really a breakthrough in patient care.”

“This eConsult helped not only with this case, but consultant sent me helpful reference for care of future patients. It was a valuable learning opportunity. Thank you!”

“I am impressed at the depth of the response and the timeliness - thank you!”

“Many thanks for the prompt reply. Helps to know I am probably not missing anything important.”
